

PeopleReign is uniquely pre-configured with

# 5 MILLION+

common HR and IT concepts

“Do I need to update my W-2”

“Can I get new glasses this year?”

“I’m locked out of my account, help!”

“Zoom login isn’t working”

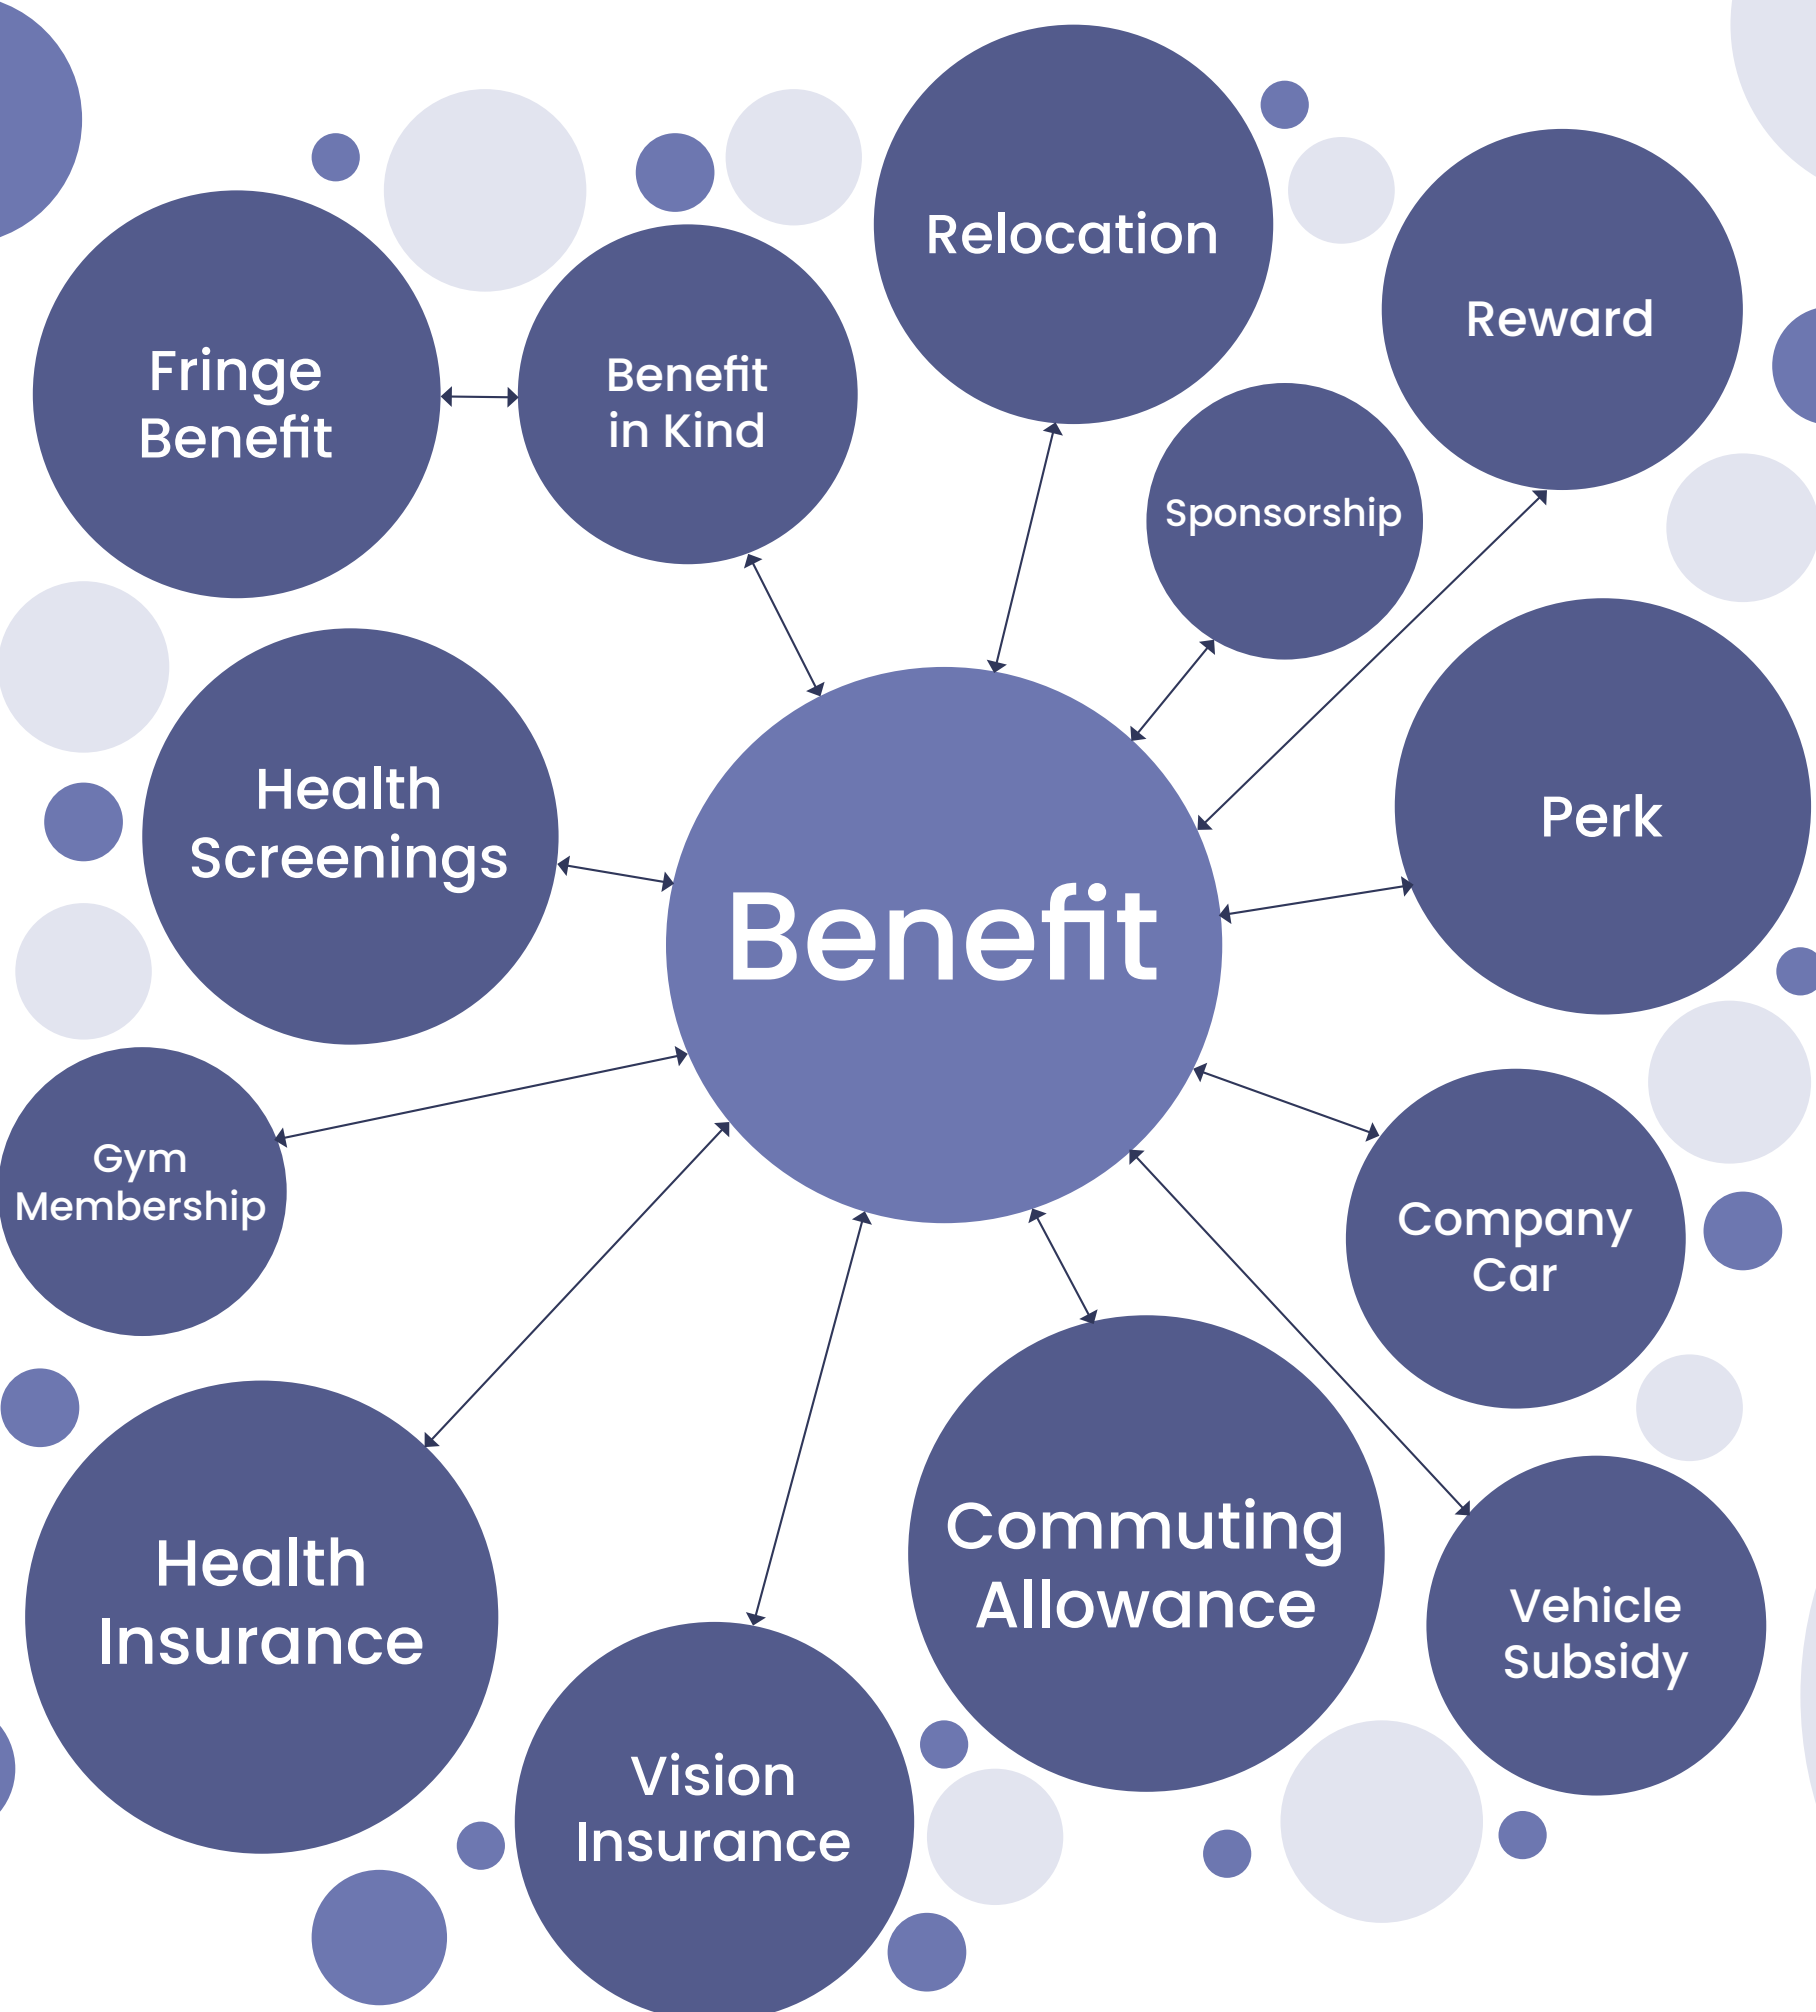

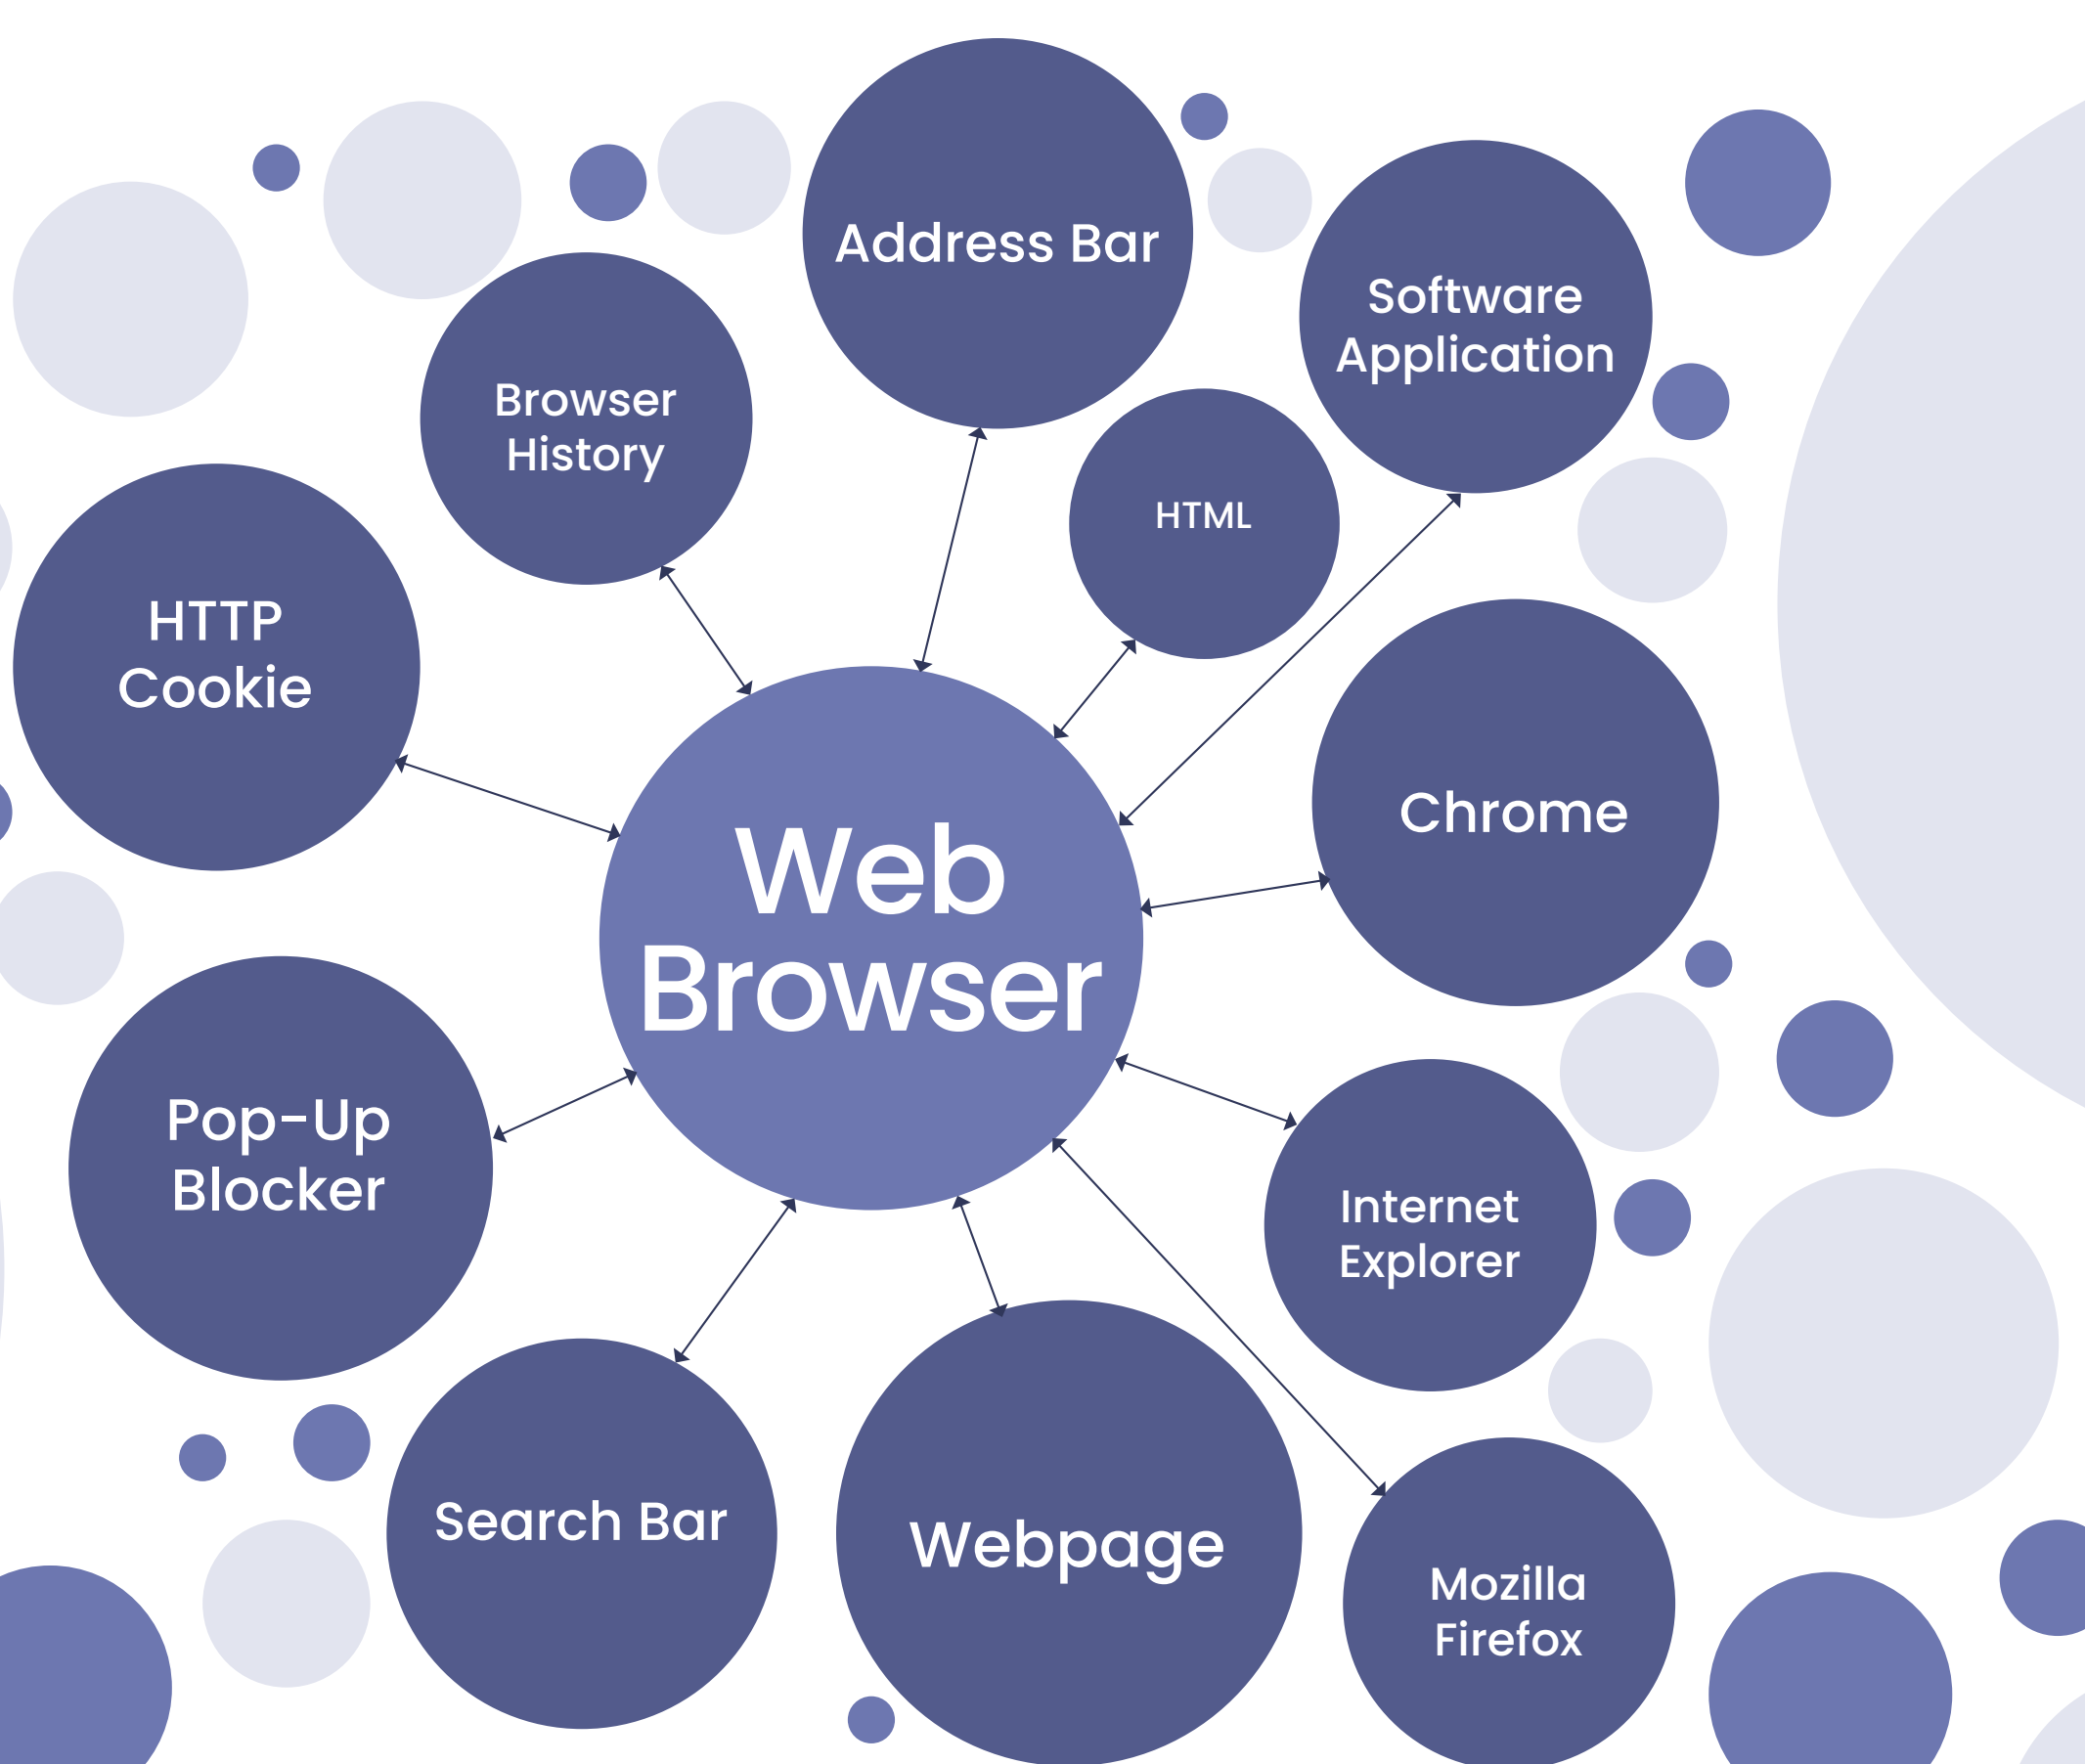

“Where can I get to my pay stub?”

“Mileage reimbursement?”

## Pre-configured Ontologies

PeopleReign’s sophisticated knowledge graphs know that, for instance, “Zoom” is a software and software might crash or need password resets, so the system already knows where to look for answers to a user input like “Zoom help!”

### SAMPLE ONTOLOGIES

## Value by the Numbers

**An average employee submits 25 tickets per year, and it takes an average of 15 hours to resolve a ticket.**

That’s 375 hours of waiting per employee per year! At 65% call deflection, PeopleReign’s pre-configured ontologies can give an employee back 10 full days of waiting per year to get back to productivity.

**If you have 4 people on your knowledge team each writing 10 articles per week, that’s only 2,000 articles per year** — on Day One with PeopleReign you get 5 million work concepts all ready to go.

**Just how big is 5 million?** 5 million seconds = almost 58 days, and 5 million pages read at average speed = 278 days.
